

MagiX 35 DS II

Electro-hydraulic double scissor lift, 3.5 t capacity

VAS 791 031 | ASE79103180000
20012140

Order no.	Item no.	#	Part of the approval according to order no. 20012140:
20012140	002543	1	MagiX 35 DS II short 3,5T 230-400/3/50-60 VAS 791031 galv.

The MagiX 35 DS II double-scissor lift impresses with an **optimum lifting range** from small cars to a short wheelbase VW T6/SUVs. Thanks to the **low installation height of only ≤100 mm**, flat vehicles can also be driven over without any problems. We achieve full lifting capacity from a low lifting height. The MagiX 35 DS II comes with a **comfortable working height of over 2 metres**, which is important for workplace ergonomics. There is no specified drive-on direction for the MagiX 35 DS II, i.e. it can be driven on from both sides and the operating column can be positioned flexibly. It also works **without compressed air and safety catch**. The MagiX 35 DS II scores with lubrication-free Teflon plain bearings in all joints and a stable scissor construction that ensures high lateral stability. Synchronisation is monitored electronically.

Standard Colour:

Platform & scissor: RAL 7040

Ramps: RAL 7040

Variants:

F = hot-dip galvanised platforms

Options:

Set of expansion bolts

LED-lighting for surface-mounted installation

Installation frame galvanized, for recessed installation

Rubber blocks in different heights

Hose extension incl. Covers (+1m)

Additional long drive-over ramps for lowered cars

Installation on floor or recessed with the same lift
